| Gorment To date, it has been assumed that a melical eccipment depot of the GOFG was on Bertinistrasse, Potsdam. However, this assumption was hypothetical since Tedical Depot | has located there prior to its transfer to Fuerstenwalde Waldfrieden in Sugast 1950. Unlike other medical depots in the Soviet Bone of Germany, the one in lotsdam has no longer been listed in reports on rail movements. Therefore it can be concluded that only shall quantities of medical equipment are stored in Lotsdam, if there are any stocks at all. The periodic observation of heavy traffic of ambulances tends to indicate that an ambulance transport unit, probably a battalion | is subordinate to the GOFG. All motor vehicles listed in the present report belong to the GOFG. No ambulance transport unit has to date been observed in the Soviet Zone of Germany.
